

## SEPTIC TANKS INSTALLED, EMPTIED & REPAIRED

Septic tanks need to be cleaned at least every 2 years to ensure long life of your tank. We offer a site inspection and all our staff are trained on the septic tank regulations.

## WASTE WATER TREATMENT SYSTEMS

We desludge, service & repair Waste Water Treatment Plants (WWTP) for commercial, residential & domestic use.

## UNBLOCK DRAINS

If your drains are blocked causing bad smells, this might put pressure on your water system and needs to be inspected immediately.

## SLUDGE SCREENING.- MSU10

The MSU:10 has been designed to facilitate efficient liquid and solid separation from a variety of applications. It can be applied to several suitable applications including; screenings removal from sludge, grit removal from sludge, pre-screener for removal of larger debris/screenings prior to processing, temporary import sludge screen.

## GREASE TRAPS

Fats, Oil and Grease (FOG) Programme – The introduction of the Effluent Discharge Licence under the Water Pollution Acts 1977 (&1990 as amended) demands that any businesses that serve food must have adequate systems to trap grease and protect contamination of watercourses. Such businesses are now required to have grease traps and an ongoing maintenance plan as part of environmental protection legislation.

We can supply and fit the correct size of grease trap for your premises.
